

amenity lighting range

Client: Simplex

- Industrial / Commercial applications
- Use of low energy source
- Internal / external use
- Standard base module

Brief:

Simplex Lighting Ltd are manufacturers of light fittings for both industrial and commercial applications. They approached SA about designing their latest range of amenity lighting.

Solution:

SA created a range of lights based around a single base module, upon which interchangeable lenses could be fitted to alter the appearance. The designs also utilised low energy compact light sources.

Result:

The finished range of lighting products were developed from sketches to 3D CAD models and later onto working prototypes, using low cost rapid-prototyping processes.
