

# handheld combination meter

Client: **Megger**

- Rugged industrial styling
- Designed for multiple product variants
- High volume manufacture
- Ergonomic grip

## Brief:

Avo International (Now Megger) a large supplier of electrical test equipment invited SA to design an industrial handheld electrical combination meter.

## Solution:

SA came up with the idea of making the interface as large as possible for easy operation in the field. The use of a two part injection moulding, along with the replaceable fascias between variants kept product cost to a minimum.

## Result:

Sadler Associates solution, as shown in the illustrations, has proven to be very robust and ideal for use by industry professionals. The product has proven to be a successful model in the Megger range.
