

network display panel

Client: **TREND**

- Product styling suitable for world markets
- Integration with client electronics team
- Designed for intuitive operation
- Flexibility of different variants

Brief:

Trend Controls, a Novar Group Company, commissioned SA to design their latest network display panel for their environmental control systems.

Solution:

Working from Trend's brief to use a touch screen, SA developed a simple intuitive design that doesn't impose on its surroundings. The design also empowers the customer to be flexible in choosing from different variants to suit their needs.

Result:

Novar Trend have successfully launched this product, with much anticipation from the market, especially following the success of the SA designed IQ3 series.
